A Trusted Name. Riveting New Products.

Marson®
Air/Hydraulic
Rivet Nut Tools

At Marson, we're always thinking ahead by bringing advanced tooling innovations to market. Strong, reliable tools designed to help make the job at hand easier and ultimately, more productive.

Spin/Spin Pneumatic Rivet Nut Tool (SST)

NEW

The versatile, low cost, Spin/Spin pneumatic rivet nut production tool now comes with a quick-change nosepiece assembly and standard socket head cap screw mandrel for convenient replacement and change over. For added ease of operation, the Spin/Spin offers a superior ergonomic design, lightweight body, and operates without stroke adjustment. Available models come supplied with two nosepieces and mandrels accommodating installation of rivet nuts ranging in size from 4mm and 8-32" to 8mm and 5/16-18".

Additional nosepiece and mandrel sizes are available:

- 39801 (SST-1) - 3000 RPM**
Standard: 4mm and 8/32"
Optional: 3mm and 6/32"
- 39802 (SST-2) - 1500 RPM**
Standard: 6mm and 1/4-20"
Optional: 5mm, 10-24", 10-32", 1/4-28"
- 39804 (SST-4) - 400 RPM**
Standard: 8mm and 5/16-18"
Optional: 10mm, 5/16-24", 3/8-16", 3/8-24"

Spin/Pull Rivet Nut Setting Tool (160-SP)

NEW GENERATION

- 39225**
accommodates rivet nut thread sizes 6-32" through 1/2-13"
- 39226**
accommodates rivet nut thread sizes 4mm through 12mm
- Weight:** 6 lbs.

The new Marson 160-SP Spin/Pull rivet nut setting tool is our most powerful air/hydraulic rivet nut tool yet. Engage the rivet nut onto the mandrel, and the 160-SP automatically threads the fastener on the tool. Pressing and holding the trigger in position will set the rivet nut and reverse itself out automatically, all in one operation.

This advanced tool features an adjustable stroke knob in the base of the tool to fully adjust stroke length to suit any grip range. Included is a swivel air inlet for increased mobility. For added convenience, adjustments and changes are performed outside the tool, with no required tear down to adjust the stroke or change thread sizes.
