

Klik-Nut[®] Threaded Inserts

**Introducing More of a Good Thing.
More Sizes. More Finishes. More Alcoa Quality.**

The line of Marson-brand Klik-Nut Threaded Inserts has been extended. That means a wider range of types, sizes, and finishes, for a spectrum of applications. This broad new selection includes ribbed, hex body, neoprene/brass, and knurled threaded inserts. All engineered for reliability and strength. All manufactured with the superior features and benefits you've come to expect from Alcoa Fastening Systems.

MRN Series Flathead Rivet-Nut

Cross section view

Available in Steel-Zinc Plated or Aluminum Class 2B Threads

MRN Series Flathead Rivet-Nut

MRN Series Rivet-Nuts can be used in a wide range of applications and are designed to provide a very efficient and cost-effective method of placing permanent threads in thin materials. Installed from one side, MRN Nuts are perfect for use in metal, fiberglass and rigid plastic previously too thin for tapped threads. They provide a neat appearance and once in place, the internal threads are ready for a screw or bolt.

Lightweight tooling assures easy installation by the operator and reduces costs when compared with other methods. After installation, MRN Series Rivet-Nuts provide permanent, captive threads that do not allow loosening under vibration and will not rotate when attached to the mating material.

MRN Series Rivet-Nuts with large diameter heads can be used in soft materials which inherently offer little, if any, thread strength.

The flathead design provides the most bearing surface for higher torque applications. The larger flange extends above the material in which it is installed and provides a built-in spacer.

MRN Series Flathead Rivet-Nut Specifications (in inches)

4 Easy Steps for Installation

1 Drill hole to correct diameter, thread fastener onto tool mandrel and insert into hole.

2 Actuate tool to properly set fastener into material.

3 Complete your fastening operation with a bolt or screw with the proper thread.

4 The positive riveting action of both Klik Rivet-Nuts and Klik Poly-Nuts provide consistent firm fastening. Push-out and shake-loose are virtually eliminated.

As shown above, Klik-Nuts can be used to fasten multiple sheets as well as single sheets

ML Series Ribbed Threaded Inserts

Available in Steel-Zinc Plated or Aluminum Class 2B Threads

ML Series Ribbed Klik-Nuts provide an efficient and cost-effective method of placing permanent threads in thin materials. Installed from one side, these inserts are perfect for use in metal, fiberglass, and rigid plastic too thin for tapped threads. Lightweight manual and pneumatic tooling assures easy installation. Once in place, the insert's internal threads are ready for a screw or bolt. Additional features include: increased torque strength over conventional style, 60° ribbed expansion after setting, vibration resistance, and a large flanged head which increases push out strength.

MK Series Ribbed Threaded Inserts

Available in Steel-Zinc Plated or Aluminum Class 2B Threads

Designed for use with Grade 5 or Metric Class 8.8/9.8 mating screws, MK Series Threaded Inserts allow for virtually flush installation. This is due to the knurled body design and reduced profile head. In addition, with the MK Series, countersink drilling or dimpling of the parent material is practically eliminated. Installation is easy using our manual or pneumatic tooling.

Other MK design benefits include superior thread strength, outstanding corrosion resistance, and prevention of thread dilation due to the increased cross-sectional thickness of the thread area.

MH Series Hex Body Threaded Inserts

Available in Steel-Zinc Plated Class 2B Threads

The radius corner hex body design allows the MH Series Hex Body Threaded Insert to expand and fill the entire hole, thus providing exceptional torque strength and superior vibration resistance. Designed to be used with Grade 5 or Metric Class 8.8/8.9 mating screws, the MH Series offers unparalleled thread strength, prevention of thread dilation, and quality installations even in variable material thicknesses. Compatible Marson manual and pneumatic installation tools ensure secure installation without adjustment.

Klik® Poly-Nut

Cross section view

Available in Steel-Zinc Plated or Aluminum Class 2B Threads

Klik Poly-Nut (Expander)

Klik Poly-Nuts can be used in a wide range of applications and are designed to provide a very efficient and cost-effective method of placing permanent threads in thin materials. Installed from one side, Klik Poly-Nuts are perfect for use in metal, fiberglass and rigid plastic previously too thin for tapped threads. Klik Poly-Nuts provide a nearly flush appearance and once in place, the internal threads are ready for a screw or bolt.

Lightweight tooling assures easy installation by the operator and reduces costs when compared with other methods. After installation, Klik Poly-Nuts provide permanent, captive threads that do not allow loosening under vibration and will not rotate when attached to the mating material.

* Note: Hole size is critical for proper installation

Klik® Thread-Serts

Thread-Serts

Klik Thread-Serts are a versatile threaded fastener that can be used in a variety of applications. Use Klik Thread-Serts in any thickness of metal or rigid material of at least 3/32" (.0937). Eliminate the need for tapping, welding and brazing. Klik Thread-Serts' design consists of an upper sleeve and a base which has both internal and external threads. During installation the base is drawn upwards inside the upper sleeve forcing a 360° contact between the sleeve and application material. No special preparation is needed; a drilled or punched hole is all that is required. Because of its unique setting ability, Klik Thread-Serts can be used in almost any thickness of material. Installation is made easy with a variety of tools and kits.

MWN Series Neoprene Inserts

Available in Steel-Zinc Plated Class 2B Threads

This flanged neoprene bushing features a brass machine nut molded into one end of the insert. When a conventional machine screw is tightened in the brass nut, the insert expands, providing an ultra-secure fastening joint. The MWN Series Insert is installed in one easy step, with applications including everything from heating fan motors and radiator mountings to door hinges. Features include blind hole fastening, moisture protection, vibration and shock dampening, and easy installation with conventional tools.

MJN Series Quad Leg Threaded Inserts

Available in Steel-Zinc Plated Class 2B Threads

Designed for cost efficient use, the MJN Series Quad Leg Threaded inserts from Marson are ideal for assembly-line applications where thin, soft, or brittle materials are utilized. When tightened, the body collapses to form legs which grip the inside of the mounting surface. The result is a permanent, reusable threaded insert.

The MJN Series fastens solidly in blind holes, won't distort or deform soft plastics or thin sheet metals, and is fast, inexpensive, and easy to use. Applications range from toys and license plate brackets to truck utility compartments. Installation is easy using Marson manual or pneumatic tooling.

Threaded Insert Tools

Thread-Setter™ Tool/39200

This quality threaded insert installation tool features patented bearing design, comfortable hand grips and a locking chain. The 39200 installs all sizes of Klik Poly-Nuts and Klik Rivet-Nuts up to 1/4-20 and 6mm threads in steel. The forged, heat treated steel upper handle, precision die-cast body of high strength aluminum alloy, patented fulcrum pin design and comfortable hand grips all combine to make the 39200 a rugged, durable tool. The tool is packaged in a reusable, heavy-duty vinyl pouch containing mandrels and nosepieces to set 8-32, 10-24 and 10-32 inserts. Weight: 1.2 lbs.

39221/150-SP

This spin-pull tool automatically threads the fastener onto the mandrel. Press the trigger and the fastener is installed. Reverse the trigger, and the mandrel spins out of the fastener. The 39221 features a totally adjustable stroke length to suit any grip range and a swivel air inlet for increased mobility. No complicated tear down is required to adjust the stroke or to change thread sizes...both adjustments are done outside of the tool. The 39221 handles rivet-nut sizes 4-40 through $\frac{1}{2}$ "-20 and 3.5mm through 10mm in aluminum or steel. 6-32 through $\frac{3}{8}$ "-16 mandrels and nosepieces are included. Weight: 6 lbs.

Tool also available with metric mandrels and nosepieces, part No. 39222.

39223/140-SP

Similar to the 39221/150-SP, this lower cost alternative handles threaded insert sizes from 6-32 through $\frac{1}{4}$ "-20 and 4mm through 6mm in aluminum or steel. 6-32 through $\frac{1}{4}$ "-20 mandrels and nosepieces are included. Weight: 4.9 lbs.

Threaded Insert Kits

Thread-Setter Kit/34501

Model 34501 Thread-Setter Kit contains the 39200 thread-setter tool in a molded plastic case; mandrels and nosepieces for 6-32, 8-32, 10-24 sizes, and a mandrel for 1/4-20. The kit also includes 103 assorted Klik Rivet-Nuts and Klik Poly-Nuts, instructions and wrench, all contained in a compartmentalized carrying case. Weight: 2.75 lbs.

Metric Ribbed Rivet-Nut Kit/39216

Model 39216 Ribbed Rivet-Nut kit contains the 39200 thread-setter tool in a molded plastic case with 4mm, 5mm, 6mm and 8mm mandrels and nosepieces, wrench and instructions. The kit also includes 50 assorted Ribbed style Rivet-Nuts. Weight: 2.75 lbs.

Poly-Nut Kit/39202

Model 39202 Poly-Nut Kit contains the 39200 thread-setter tool in a molded plastic case with 8-32, 10-32 and 1/4-20 mandrels and nosepieces, wrench and instructions. The kit contains 52 assorted Klik Poly-Nuts: 12 each 57425, 57435, 57445; 16 each 57455. Weight: 3 lbs.

Steel Klik Thread-sert Kit/39214

Model 39214 Thread-sert Kit contains the 39200 thread-setter tool in a plastic case with 6-32, 8-32, 10-24, 10-32, 1/4-20, 5/16-18 and 3/8-16 mandrels and nosepieces, wrench and instructions. The kit contains 62 assorted Steel Klik Thread-serts: 10 each 57810, 57820, 57830, 57840, 57850; 6 each 57871, 57881. Weight: 3.25 lbs.

Metric Poly-Nut Kit/39203

Model 39203 Metric Poly-Nut Kit contains the 39200 thread-setter tool in a molded plastic case with 4mm, 5mm, 6mm and 8mm mandrels and nosepieces, wrench and instructions. The kit contains 75 assorted Klik Poly-Nuts: 25 each 57407, 57409; 15 each 57411; 10 each 57413. Weight: 3.25 lbs.

Aluminum Klik Thread-sert Kit/39213

Model 39213 Thread-sert Kit contains the 39200 thread-setter tool in a molded plastic case with 6-32, 8-32, 10-24, 10-32, 1/4-20, 5/16-18 and 3/8-16 mandrels and nosepieces, wrench and instructions. The kit contains 62 assorted Aluminum Klik Thread-serts: 10 each 57910, 57920, 57930, 57940, 57950; 6 each 57971, 57981. Weight: 3 lbs.

Ribbed Rivet-Nut Kit/39215

Model 39215 Ribbed Rivet-Nut kit contains the 39200 thread-setter tool in a molded plastic case; mandrels, nosepieces, wrench & instructions for setting 8-32, 10-24, 10-32 and 1/4-20 inserts. Includes 50 assorted Ribbed style Rivet-Nuts. Weight: 2.75 lbs.

Along with a comprehensive selection of threaded inserts and riveting tools, Alcoa Fastening Systems (AFS) offers the broadest line of Marson® brand industrial and automotive blind fasteners available. AFS regularly makes nationwide delivery of product within hours when necessary. In addition to unsurpassed product coverage and off-the-shelf

availability, AFS provides such custom services as painting, plating, anodizing, packaging, bar-coding, and labeling for Marson products. The company's Total Quality Management System and QS-9000 certification reflects an uncompromising emphasis on quality assurance and customer satisfaction.

Alcoa Fastening Systems Commercial Products: A Global Organization

Alcoa Fastening Systems maintains company offices in the United States and Canada, with offices in many other countries. Authorized AFS distributors are also located in

many of the world's industrial centers, where they provide a ready source of fasteners, installation tools, tool parts, and application assistance.
